01/27/2011

Turn-Page offers a spectacular mobile native app that is fast and responsive. Whether you need a magazine app developed, a book app, a newspaper app, catalogue or any other type of publication, Turn-Page Mobile's basic features include everything needed to publish your brand on the fastest growing mobile platform.

Turn-Page supports iPhone iPad and iPod touch. Android and Blackberry will be added later in Q2 therefore increasing the reach of every publication.

Why should you have a Native app for your publication?

Having your publication listed in the App store. Be accessible to users who have completed over 18 billion app downloads to-date, as well as the more than 200 million devices accessing the app store.

With Turn-Page Mobile the user experience is second to none. We have taken the best features offered in other magazine apps and incorporated them into Turn-Page Mobile. We offer this technology to publishers for a fraction of what it would cost them to develop an app like this from scratch.

Publications come alive with agile animation, graphics and streaming media.

Features include:

Native swipe, Pinch to zoom, Social Network sharing, Email a friend, Page navigator, Link to Blog, Custom skin, icon and splash screen, App store submission and much more.

Turn-Page Mobile can be downloaded onto the device for future offline access, with no need for an internet connection.

Call or email us for more information.

Regards,
Clifford Hoffer
