

# In-Line Products

Panaprint offers a variety of in-line products to enhance print quality and give you the best product for your money.

In-line products—that is, products which require no further production the moment they come off the press—offer a variety of advantages over other printed products. They are more efficient to produce, for sure. This gives your product a low price advantage compared to other products. Panaprint's in-line products also offer a faster turnaround time. You will be impressed with how fast we can get your print project to you, and most importantly, your clients will be impressed.

*The following is a list of Panaprint's most popular in-line products:*

- 8 3/8" x 10 7/8" four, eight, twelve, and sixteen page glued booklets
- 8 3/8" x 10 7/8" twelve page gate folded product
- 5 3/8" x 8 3/8" booklet, 16 pages, glued on the short side
- In-line products are suitable for paper weights between 45 lb and 80 lb
- In-line UV coating is available for these products
- And for saddle stitched booklets, consider in-line mailing on our saddle-stitchers

## Advantages of In-Line Products:

- Increased efficiency
- Lower price
- Faster turn-around

Panaprint also provides a variety of different folding and finishing options.

*We can provide you with product sheets on a variety of topics and are happy to answer any questions you may have. Ask your sales representative for more details and pricing.*
